GALAXY'S SECURITY PORTFOLIO

Network Security

We offer a full range of security products that includes Firewalls, UTM's, IPS, Network Access Control, VPN, Email & Web Security, Web Application Firewall, and micro-segmentation from leading manufacturers.

Endpoint Security

Galaxy offers advanced capabilities leveraging machine learning & artificial intelligence to deliver state-of-the-art protection at the endpoint level. We help our customers detect & remediate malware attacks, fight ransomware & ensure their systems across all form factors are patched with latest security updates.

Information Protection

Galaxy helps manage data protection challenges due to external threats or insider attacks using industry leading tools for DLP, IRM, Encryption, Secure Key Management, HSM, Secure File Transfer, Data Masking & Multifactor Authentication.

Identity & Access Management

We carry deep expertise in implementing solutions related to User Provisioning, Advanced Authentication, Single Sign-on & Privileged Access Management.

Application Security

We partner with best-of-breed application security testing solutions to secure Web & Mobile applications.

Security Management & Analytics

We help our customers gain valuable security insights into the organization's assets, respond faster to any incident, make better informed decisions in real time & analyze outcomes.
